WE ARE ABLE TO REFACTOR THE INTERNALS WITHOUT TOUCHING ANY TESTS. WE COULD EVEN REPLACE THE DATABASE FROM POSTGRESQL TO NOSQL WITHOUT HAVING TO MODIFY THE ACTUAL TEST METHODS.

https://engineering.atspotify.com/2018/01/testing-of-microservices/

THE TRADE-OFF HERE IS SOME LOSS OF SPEED IN TEST EXECUTION [... AND ...] THAT WE MIGHT LOSE SOME FEEDBACK ACCURACY WHEN A TEST FAILS

Justin Searls
@searls

I'm realizing I've never shared this publicly before, but I probably should: almost all the advice you hear about software testing is bad. It's either bad on its face or it leads to bad outcomes or it distracts by focusing on the wrong thing (usually tools). A brief thread on why

>

PART II:

Why do we write tests?

PART II:

Why do we *not* write tests?

WHY DO WE NOT WRITE TESTS?

WHY DO WE NOT WRITE TESTS?

"We don't have time for this"

WHY DO WE NOT WRITE TESTS?

"We don't have time for this"

"Tests cause extra work; they start failing when changing unrelated code, are becoming brittle quickly"

WHY DO WE DO WRITE TESTS?

"To make our managers or team lead happy"

ANY OBSERVED STATISTICAL REGULARITY WILL TEND TO COLLAPSE ONCE PRESSURE IS PLACED UPON IT FOR CONTROL PURPOSES

— Goodhart's Law

https://www.ribbonfarm.com/2016/06/09/goodharts-law-and-why-measurement-is-hard/

WHY DO WE DO WRITE TESTS?

~~“To make our managers or team lead happy”~~

WHY DO WE DO WRITE TESTS?

~~“To make our managers or team lead happy”~~

Stability for the end-user

“A MAJORITY OF THE PRODUCTION FAILURES (77%) CAN BE REPRODUCED BY A UNIT TEST.”

— Simple testing can prevent most critical failures; Research paper from the University of Toronto (2014)

https://www.usenix.org/system/files/conference/osdi14/osdi14-paper-yuan.pdf

WHY DO WE DO WRITE TESTS?

~~"To make our managers or team lead happy"~~

Stability for the end-user

Enable refactoring

CODE IS READ AND UPDATED WAY MORE OFTEN THAN IT IS WRITTEN

— Tim Bray

https://www.tbray.org/ongoing/When/202x/2021/05/15/Testing-in-2021

“WALKING ON WATER AND DEVELOPING SOFTWARE FROM A SPECIFICATION ARE EASY IF BOTH ARE FROZEN”

PART IV:

Practical tips to get started with testing

1 Be the advocate!

2

Embrace tests as a way to improve developer confidence

3

Test behaviour, not implementation details

4

Automate your tests!

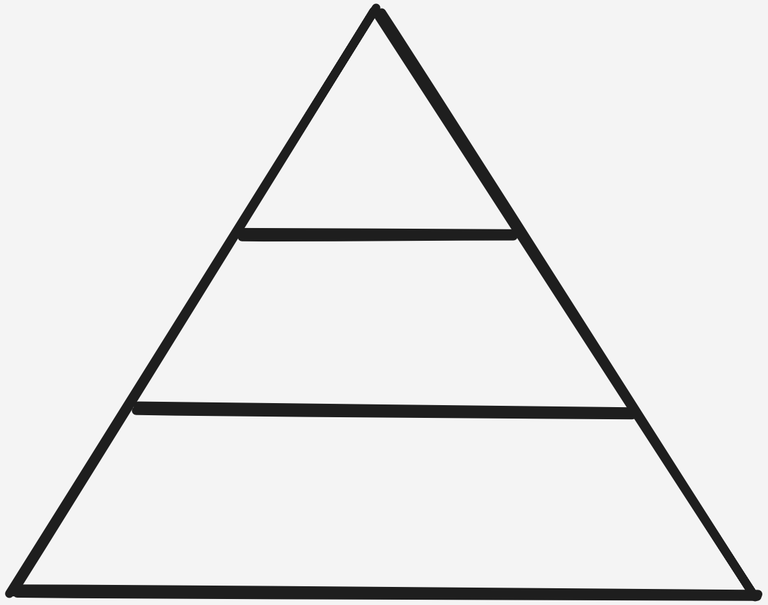
5

Identify the most common or likely points of failure in your system

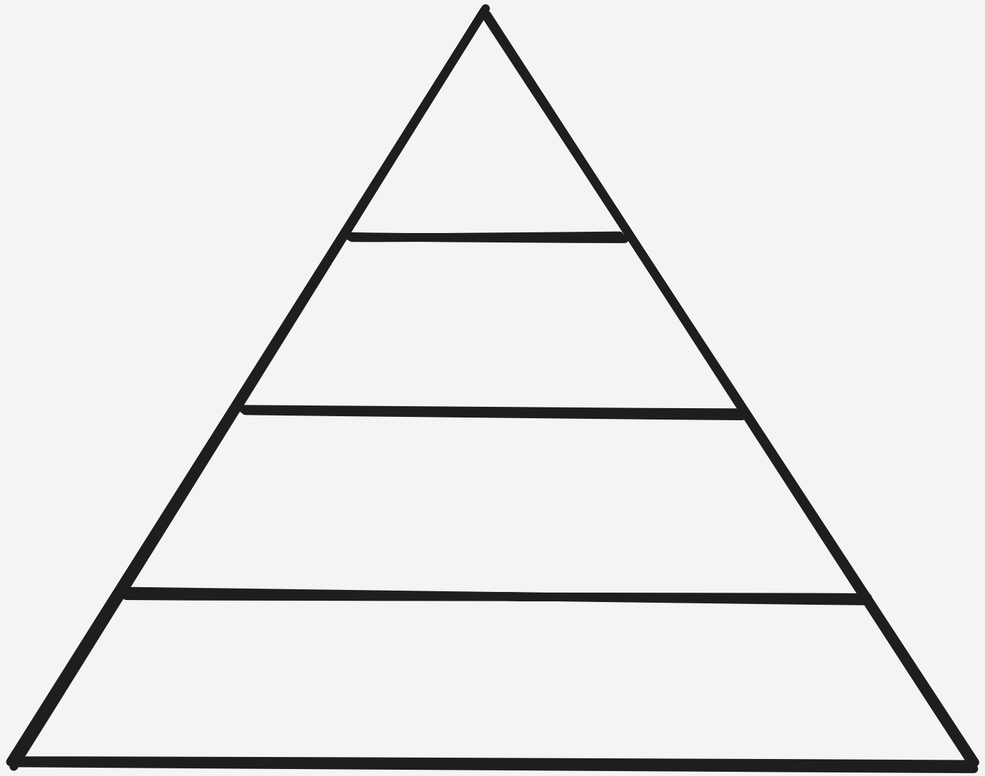
6

Don’t just blindly follow a “shape” or strategy

ENSURE YOUR “SHAPE” HAS INTENTION



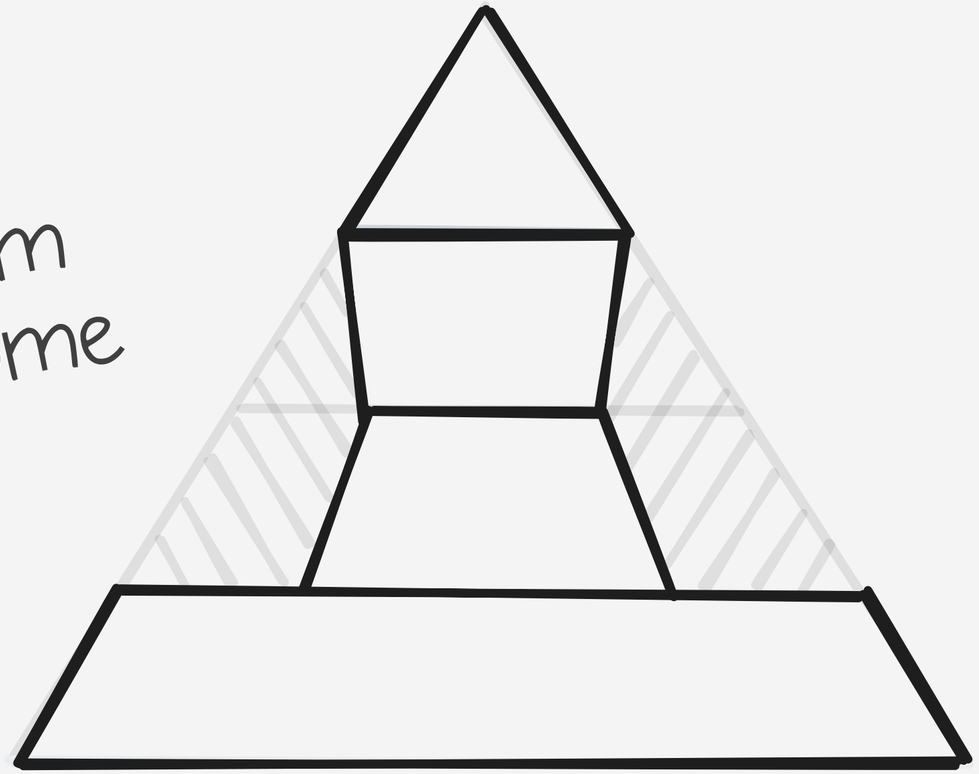
ENSURE YOUR “SHAPE” HAS INTENTION



let's add the static layer

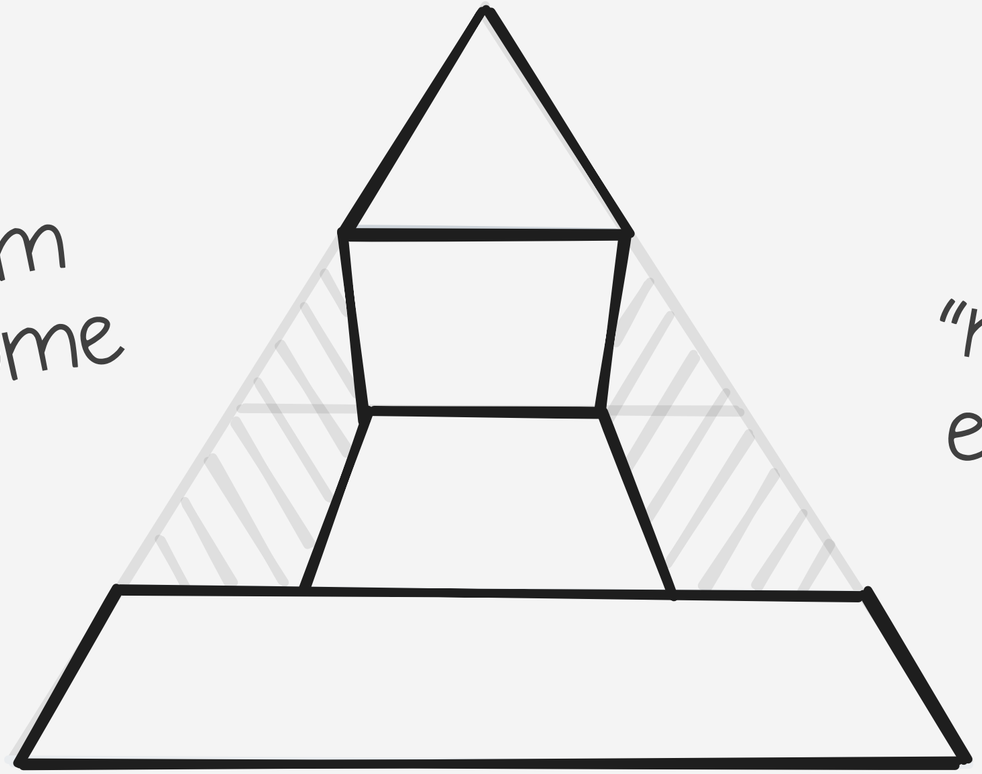
ENSURE YOUR “SHAPE” HAS INTENTION

ecosystem
covers some
tests



ENSURE YOUR “SHAPE” HAS INTENTION

ecosystem covers some tests

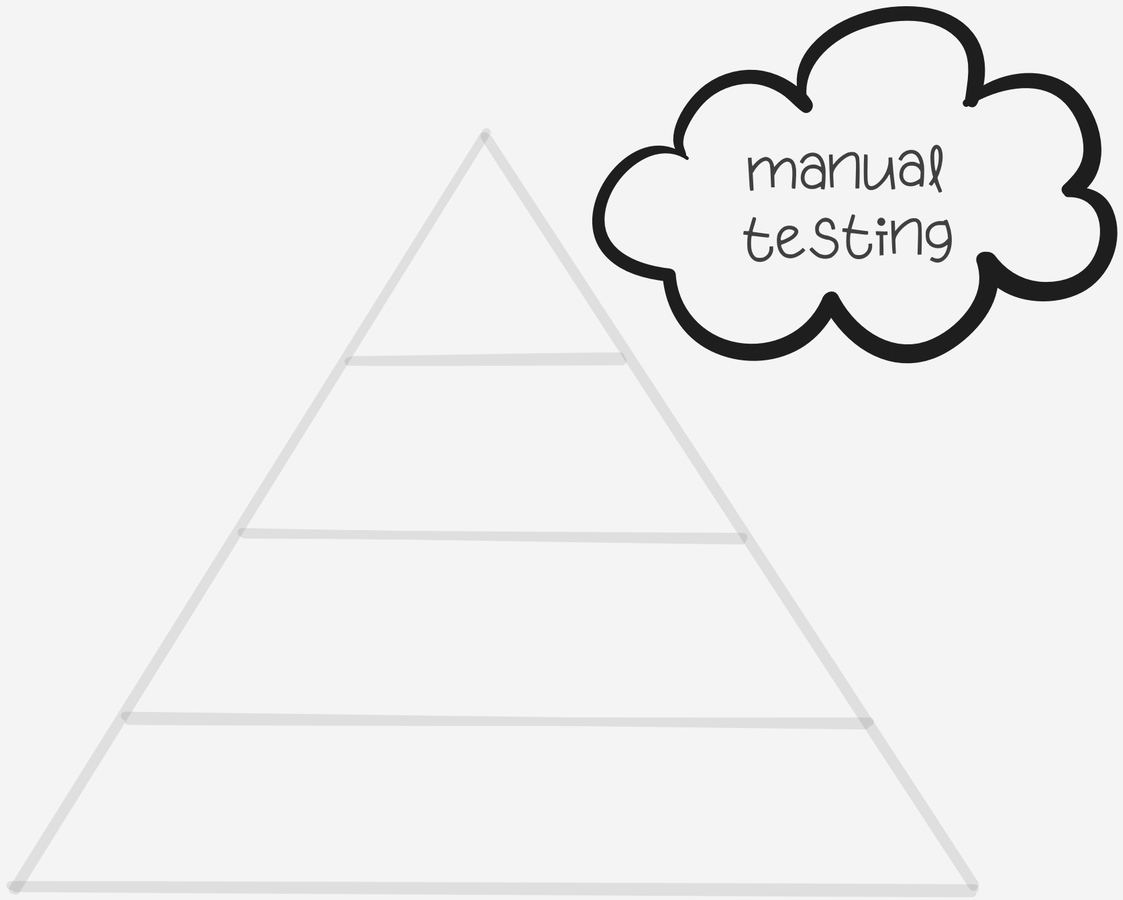


other “natural” eorsion

7

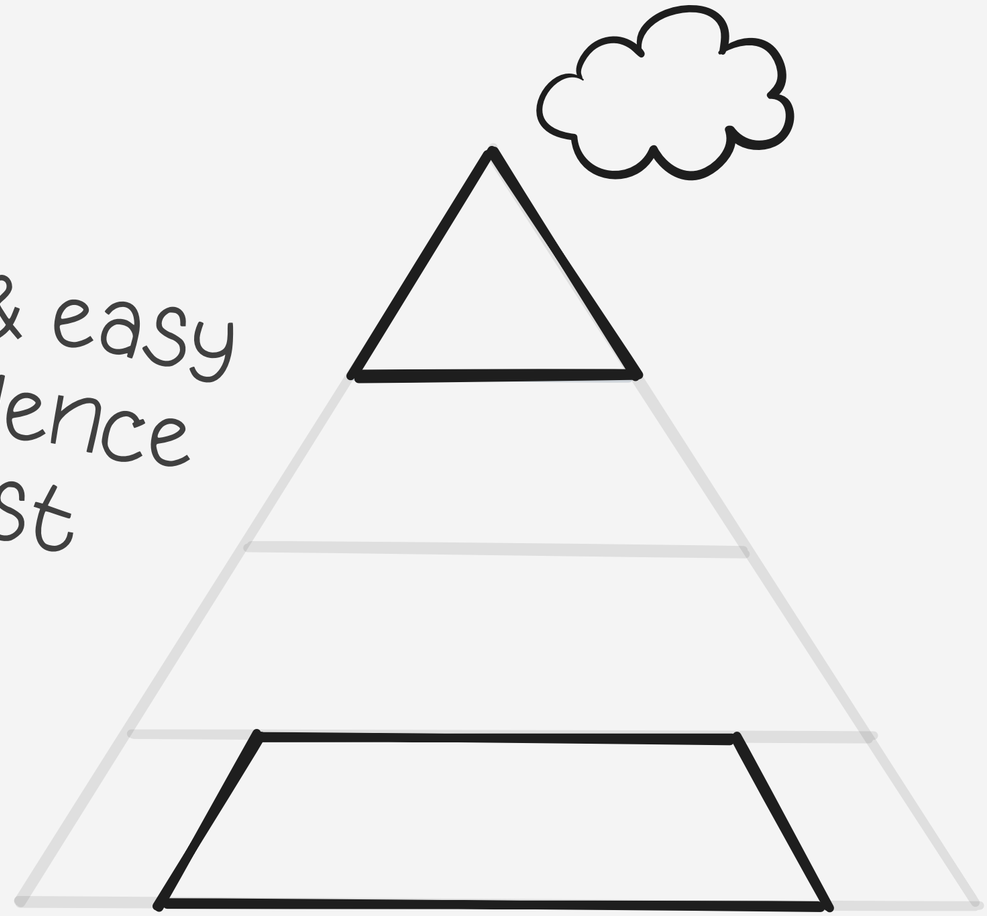
Have smaller milestones to work towards the end goal

MILESTONES TO YOUR IDEAL SETUP

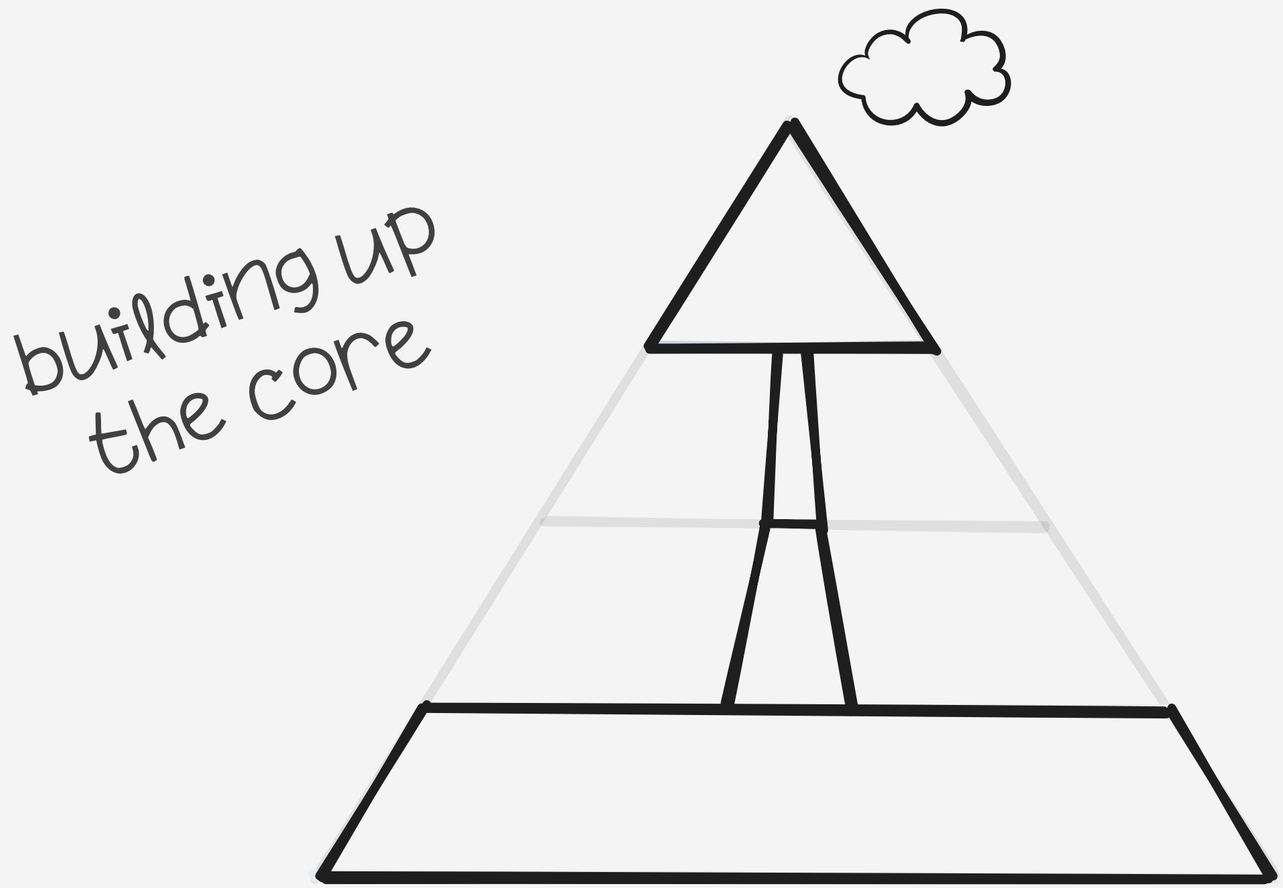


MILESTONES TO YOUR IDEAL SETUP

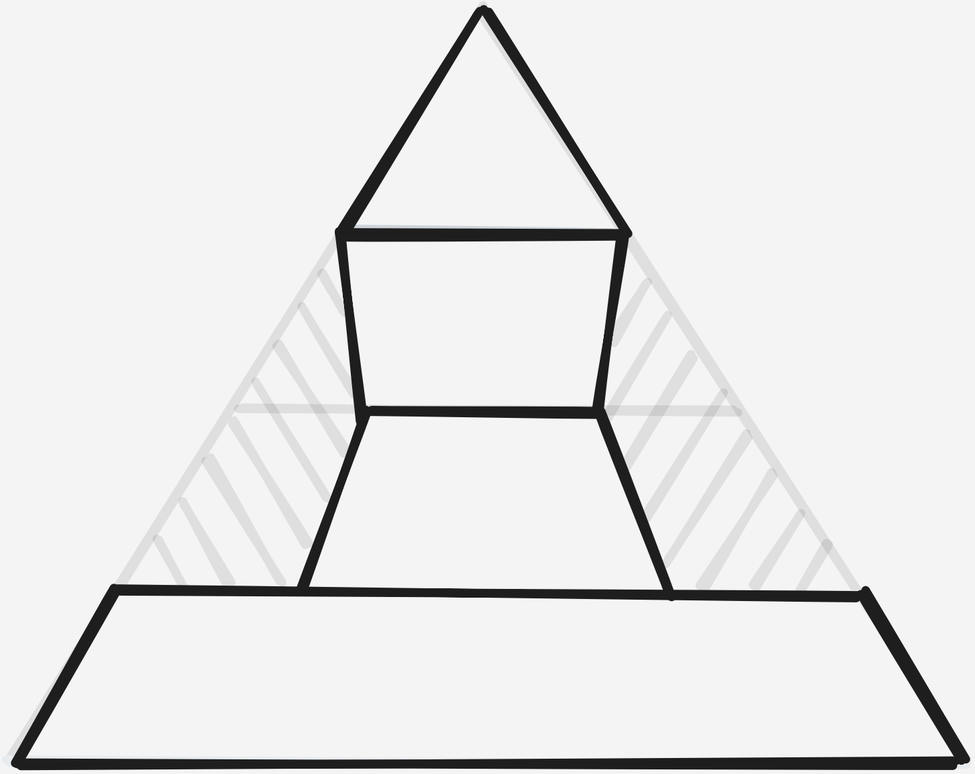
quick & easy confidence boost



MILESTONES TO YOUR IDEAL SETUP



MILESTONES TO YOUR IDEAL SETUP



THE END.
